Create an account

Open the sign-up page and complete the form from top to bottom.

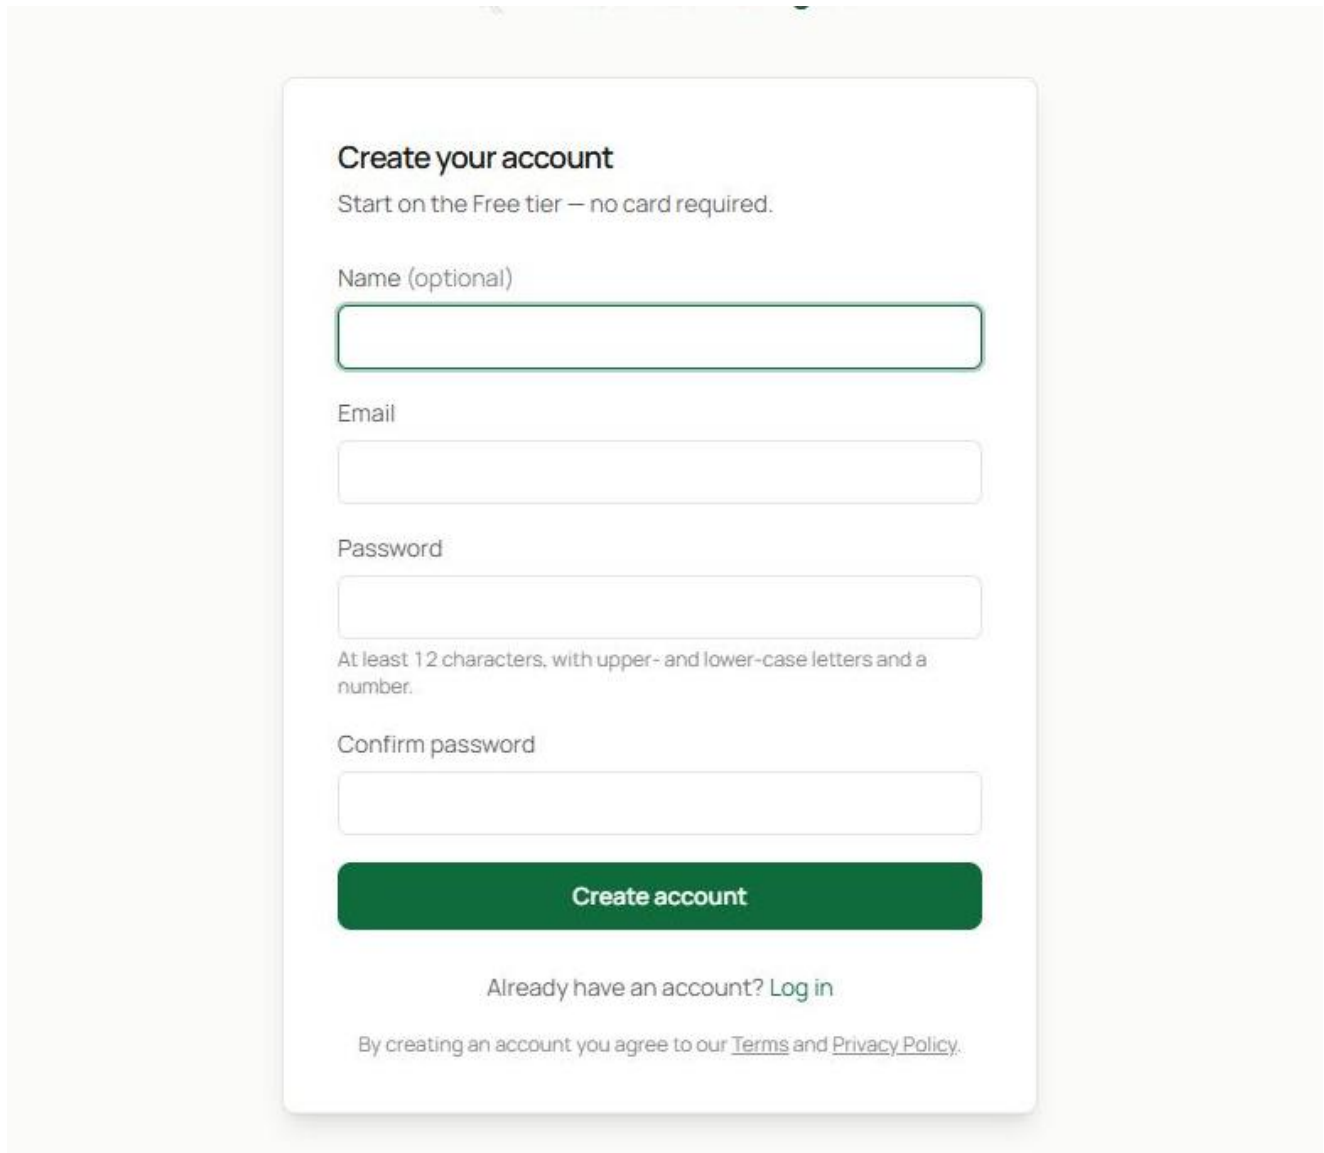

The image shows a sign-up form titled "Create your account". Below the title is a sub-header: "Start on the Free tier — no card required." The form contains four input fields: "Name (optional)", "Email", "Password", and "Confirm password". The "Password" field has a note below it: "At least 12 characters, with upper- and lower-case letters and a number." Below the input fields is a green button labeled "Create account". At the bottom of the form, there is a link: "Already have an account? Log in" and a disclaimer: "By creating an account you agree to our [Terms](#) and [Privacy Policy](#)."

Figure 1. The TracksideRacing.AI sign-up form showing the account fields and Create account button.

1. Enter your name. This is optional, but it helps personalise your account.
2. Enter the email address you want to use to sign in.
3. Create and confirm a password. Follow the strength guidance shown below the password field.
4. Select **Create account**. If the details are accepted, you can continue into the application.

The Free tier does not require a payment card. Paid features remain visibly locked until the corresponding plan is active.

Sign in

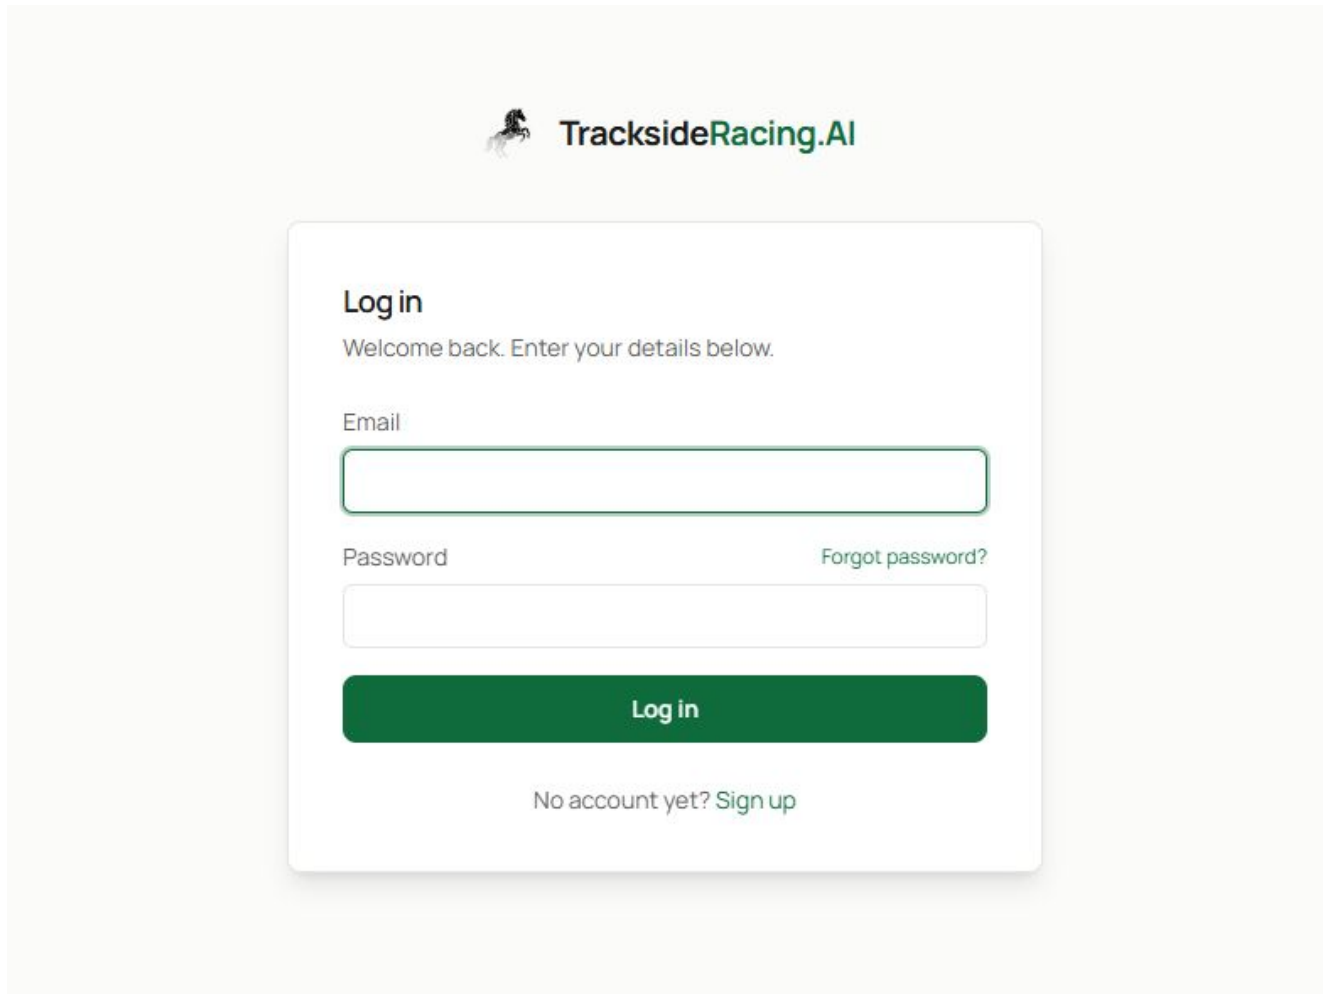

Figure 2. The TracksideRacing.AI login form showing email, password, recovery and login controls.

1. Enter the email address linked to your account.
2. Enter your password.
3. Use **Forgot password?** if you cannot remember it. Enter your account email on the recovery page and follow the instructions sent to you.
4. Select **Login**. New members can follow the **Sign up** link below the button instead.

If the page reports that your credentials are not recognised, check for typing errors first. Passwords are case-sensitive. If a reset email does not appear, check your spam folder and confirm that you used the address registered to the account.

Set your display preferences

The controls in the top bar stay available throughout the application:

- Select **Decimal** or **Fractional** to choose how prices are shown.
- Select **Light** or **Dark** to change the colour theme.
- Use the account menu for account actions, including signing out.

Your theme choice is shared with the public TracksideRacing.AI website on the same device, so moving between the site and the application feels consistent.

Manage security

Open **Settings**, then select the **Security** tab.

Settings
Manage your account, security and subscription.

Profile Security Billing

Change password

Current password

New password

At least 12 characters, with upper- and lower-case letters and a number.

Confirm new password

Change password

Two-factor authentication
Add an authenticator-app code to your login. Strongly recommended for admin accounts.

Set up 2FA

Figure 3. The Settings security page showing the tab, password form and two-factor authentication panel.

1. The Settings tabs separate profile, security and billing information. Choose **Security** for sign-in protection.
2. To change your password, enter the current password, then enter and confirm the new one. Select **Change password** only when all three fields are complete.
3. Select **Set up 2FA** to add two-factor authentication. Follow the on-screen setup and store any recovery information somewhere safe.

Use a password that is unique to TracksideRacing.AI. Two-factor authentication is strongly recommended, especially if the account is used on shared or mobile devices.

Profile and billing

The **Profile** tab holds your personal account details. The **Billing** tab shows the active plan and subscription controls available to you. If a feature is locked, check its minimum plan in the relevant guide, then use Billing to review upgrade options.

When you finish a session

Sign out from the account menu if you are using a shared computer. On a personal device, you can remain signed in, but keep the device itself protected.
